Module Carts
Flexibility in design & specification

MedStor®
The heart of your storage solutions

Healthcare storage, logistics
and product handling

ORGANISATION - IDENTIFICATION - TRANSPORTATION

Multi-functional mobile storage units designed for your working environment.

CONTENTS

CONTINUOUS WORKFLOW

Module carts integrate with our healthcare storage range by utilising the Medstor tray and divider system. Medstor module carts offer a choice of:

- **Height options**
- **Drawer configurations**
- **Door & drawer options**
- **Locking systems**
- **Expansive range of accessories**
- **Optional colourways & decals**

Designed and manufactured in the UK by Medstor, giving us total system control with product continuity.

MODULE CARTS
Delivering care exactly where it is needed.

Medstor's mobile Module Carts offer flexibility in design, specification and style. They can be fully customised for purpose, so are suitable for every area from bedside to anaesthesia, built precisely for the environment in which they will be used. Complete with a choice of locks to guarantee secure storage.

Bright, robust and easy to manoeuvre, the Module Carts provide safe and efficient storage space with hygienic work surfaces and optional accessories.

The carts are compatible with Medstor's unique in-built organisation and product identification tray and liner system, which maximises storage capacity and ensures contents are easy to identify and access.

Module Carts take essential items exactly where they are needed, quickly and easily.

Resus Cart

A MOBILE UNIT FOR EMERGENCY SITUATIONS – TAKING LIFE-SAVING EQUIPMENT TO THE POINT OF CARE

When time is critical, having everything in one place streamlines the delivery of essential care. Medstor's mobile Resus Cart provides a platform for the equipment and consumables needed during in-hospital resuscitation, custom designed to support outstanding patient care when space is limited, but treatment vital.

The Resus Cart can be built to fit available space exactly, so is always easy to store and access when needed, fully stocked and ready for use thanks to Medstor's internal tray system.

Users can specify a wide range of accessories for holding larger items such as defibrillators, oxygen cylinders and IV Poles. Accessories are securely fitted to an integral rail, so essential items are all in one place and in easy reach when needed.

Isolation Cart

DESIGNED TO DELIVER CARE WHILE PROTECTING AGAINST THE SPREAD OF INFECTION

Patients with certain conditions may be nursed in isolation to prevent them spreading or contracting infection. Medstor's mobile Isolation Carts are constructed to users' specifications from products specially treated to reduce the risk of pathogen transmission and withstand rigorous cleaning.

The Isolation Cart can be stocked with all necessary consumables then easily wheeled into the isolation area when needed. Medstor's tray and liner system ensures internal space is maximised and all contents are easy to see and access.

In addition to carrying consumables inside the Isolation Cart, users can also choose from a wide range of accessories for mounting larger items on the cart itself, such as glove boxes, caddie waste bins and IV Poles. Accessories are securely fitted to an external rail, so essential items are all in one place and within easy reach when needed.

Trauma Cart

## ENABLING THE DELIVERY OF ESSENTIAL CARE IN LIFE-THREATENING SITUATIONS

When a patient arrives at hospital following a major trauma, they need immediate access to the best diagnostic and treatment facilities, essential in life-threatening situations. Clinical staff can quickly position Medstor's Trauma Cart exactly where it is needed, with all necessary equipment in one place to avoid delays.

"Compact, manoeuvrable, robust and ideal for use in busy or limited spaces"

Trauma Cart makes up Medstor's internal tray and liner system, so can be stocked with consumables that are easily to locate and access, even in the most pressurised situation. It is also easily cleaned.

In addition to carrying consumables inside the Trauma Cart, users can also specify a wide range of accessories for mounting larger items on the cart itself, such as glove boxes, caddie waste bins and IV Poles. Accessories are securely fitted to an external rail, so essential items are all in one place and within easy reach when needed.

General Cart

FLEXIBLE AND EASY TO MANOEUVRE – BRINGING WORKSPACE AND STORAGE TO ANY AREA

In any hospital, there are a number of items that need to be kept together for ease of access, or to support patient care. Medstor's General Cart offers ultimate flexibility and can be used across the hospital in any department or ward to provide safe, secure storage of items and equipment and an extra work surface.

The mobile cart can also be dedicated to a particular patient, following the patient's journey and making the updating of vital information much easier and less susceptible to errors.

Medstor's General Carts are available in a wide range of bright colours; They can also be printed with any graphics that might complement surroundings, such as cartoon characters for on a children's ward.

In addition to carrying consumables inside the General Cart, users can also specify a wide range of accessories for mounting larger items on the cart itself, such as glove box holders, caddie waste bins and even a work surface extension. Accessories are securely fitted to an external rail, so essential items are all in one place and within easy reach.

Anaesthesia Cart

BUILT TO WITHSTAND THE RIGOURS OF DAILY USE IN A BUSY ENVIRONMENT

Medstor's Anaesthesia Cart is designed to store the tools needed during surgical procedures that require administration of anaesthetics. The Anaesthesia Cart helps to keep all the necessary equipment safely stored until needed, then easily at hand so they can be accessed quickly when required.

"It is vital that anaesthesia tools are well organised and maintained"

The Anaesthesia Cart is compact and easy to manoeuvre, and can be built to users' precise specifications to suit the available space and the area in which it will be used. It is also easy to clean and offers enhanced infection control.

In addition to carrying consumables inside the Anaesthesia Cart, users can also specify a wide range of accessories for mounting larger items on the cart itself, such as an overbridge unit, sharps bins and IV Poles. Accessories are securely fitted to an external rail, so essential items are all in one place and within easy reach when needed.

Bespoke printed graphics fit to the cart panels and brighten any paediatric department.

Broselow paediatric cart shown with overbridge unit and work surface extension.

Paediatric Carts

A COLOURFUL WAY TO DELIVER ESSENTIAL EQUIPMENT

In busy, lively paediatric wards, where health and safety may be a particular issue, the Medstor mobile Paediatric Cart is a colourful and stable way to transport essential equipment and consumables, as well as providing a useful additional work surface. Its robust construction and rounded corners make it ideally suited to a children's ward.

"Bespoke configurations and designs for your healthcare environment"

The Medstor Broselow cart is designed to be used in conjunction with The Broselow Tape (Broselow paediatric emergency tape) which relates a child's height as measured by the tape to his/her weight to provide medical instructions, including medication doses, the size of equipment that should be used and the levels of shock voltage when using a defibrillator.

All the Medstor drawers are clearly marked with the corresponding weights. Ensuring all the correct products are easily available for immediate use. Carts can be locked using tamper evident locks or dual keypad/proximity access.

**Please note non-stock sizes and finishes are subject to extended lead times.**

Bespoke printed graphics fit to the cart panels and brighten any paediatric department.

Profiles:

Lightweight anodised aluminium profiles 48mm x 22.5mm with a general wall thickness of 1.5mm are designed to secure panels from 6mm to 18mm thickness enabling the cart to be configured using: light weight composite aluminium / polymer panels.

Base frame:

Fully welded mild steel 30mm x 30mm x 1.5mm rectangular box section, electrostatic coating, with fully enclosed protective base panel.

Drawer sides:

Drawers are complete with a pair of Accuride steel telescopic runners fitted to formed and coated mild steel tray support cradles, which carry the system baskets/trays. The telescopic runners hold up to a maximum weight loading of 45kgs. Telescopic runners allow full withdrawal of the basket/trays to enable filling to the rear.

Buffers:

The Medstor Module Cart is equipped with four non marking Polyolefin polymer alloy bumpers clipped and screwed onto the fully welded base structure.

Castors:

All mobile units are fitted with 125mm Tente castors manufactured to EN 12530. Castors are chosen for roll performance, movement noise, attrition and corrosion resistance.

Swivel and swivel with lock, housing and wheels made from high grade synthetic materials, double ball bearing swivel head, bolt hole. Wheel centre made of Polypropylene, Tread: TENTEprene (thermoplastic rubber), grey non-marking, precision ball bearing. Non-static including 1 x anti-static castor
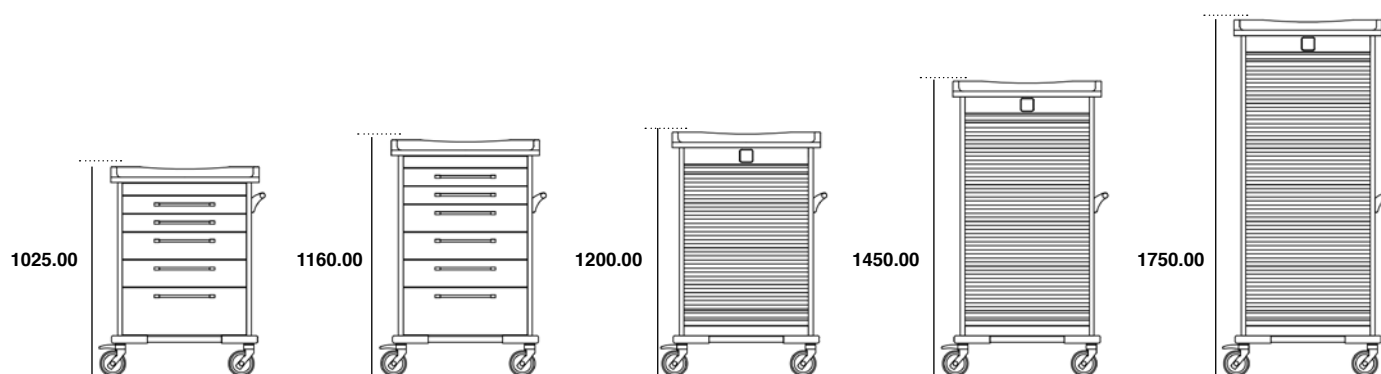

WORKTOPS

Seamless, robust and recessed acrylic capped ABS top can be fitted on as standard **(max load 45kgs).**

"The Module Carts are built around the Medstor module tray and divider system"

The Medstor trays/drawers are complete with both lengthways and widthways dividers that interwork to create multiple compartments to facilitate dual bin operations.

Trays and Dividers

STORAGE AND PROTECTION - IDEALLY SUITED TO THE RIGOURS OF ANY BUSY HOSPITAL

Extremely strong, robust and smooth Medstor trays and dividers
Above all designed to protect their contents. High temperature machine washing compliant materials are used to ensure hygienic surfaces within your environment.

Product segregation
Dividers can also be scored and snapped and used in conjunction with a system 'T' clip to create even smaller configurations. System label holders are available as standard.

TRAY TRANSPORTATION
Trays can simply be transferred from Modular Cart to any Medstor liner storage system units.

Clear Polycarbonate

TEMPERATURE RANGE -40°C TO + 120°C

- Load bearing capacity 35kg
- High impact break resistant
- Sanitised at both high and low temperatures
- Conform to international module sizes
- Full integration between trays and dividers

FULLY ADJUSTABLE TRAY DIVIDERS CREATE INDIVIDUAL COMPARTMENT

- Solid base options protect from fluid leaks
- Perforated base options improve air flow
- Inbuilt cabinet drawer stops
- Seamless hygienic design
- Nestable same size containers

EURO SIZE 600 x 400
Clear polycarbonate makes identifying materials easy, with a user temperature range of -40°C to +120°C machine wash and resistant to standard detergents.

POLYCARBONATE DIVIDERS
Correspond to relevant tray heights.

Cart Security Systems

SECURE STORAGE IN ANY ENVIRONMENT

Medstor Module Carts can be fitted with a variety of security locking options, ensuring that dangerous, costly or sensitive items are stored safely, wherever the Module Cart is being used.

Users can choose from digital code security pad or key locking systems, a locking bar or proximity fob options.
Fully tamper evident seals and individual drawer locks are also available.

"Industry-leading Module Cart security"

Clinical staff using Medstor Module Carts can be sure that even when they are working in busy or pressurised environments, items in the cart are safe and secure, offering invaluable peace of mind and allowing them to focus on patient care.

ANTI-LIGATURE HANDLES
Built into drawer fronts, available on request -
stainless steel handles fitted as standard.

HANDLE OPTIONS
Stainless steel & anti-ligature

Stainless steel handles fitted as standard.

Customise with Accessories
A TAILORED APPROACH TO CART DESIGN

Medstor Module Carts are designed to maximise all available space and ensure essential items are together and within easy reach when needed. A wide range of accessories enables users to specify a bespoke design that fits their needs exactly.

Larger items or those that need to be accessed frequently like sterile gel, can be mounted on the cart itself: glove box holders, caddie waste bins and even a defibrillator platform all attach securely via an adjustable accessory rail. For maximum safety, ergonomic design ensures all items fit as flush to the cart as possible.
